### Glossary page for Vital Signs.

A more complete glossary and list of protocols for Performance Plus can be found on the intranet help page.

- Low risk' performance indicators: this means target is being met and possibly succeeded
- 'Medium risk' performance indicators: this means target is not being met but performance is within set tolerance of the target
- 'High risk' performance indicators: this means target is not being met and performance is not within set tolerance of the target

#### Foreword

The Vital Signs Performance Digest is part of the high level performance monitoring carried out by Members and senior management of Brent Council. The digest is published quarterly and aims to provide useful information on how well Brent is performing against key indicators. The indicators reflect areas most relevant to the priorities of the council and those that are high risk.

#### High and medium risk monitoring

For each performance indicator that has been identified as high or medium risk (that is not reaching target), more information is provided.

This section includes a graph tracking performance over time against target, comments from the Lead Member and Service Director/Manager, and plans for improvement with actions and time frames.

An overview of activity is also provided to show how effectively the council is spending against its budget.

#### Areas of concern this quarter

Vital Signs risk analysis

This is the third quarter of our transitionary Vital Signs set. This quarter, the percentages of low, medium and high risk indicators were very similar to last quarter. The only real movement was that indicators with incomplete returns reduced by 3% and medium risk indicators increased by 3%.

Areas of continuing risk this quarter are recycling, sports visits, acquisitive crime and adult social care. The monitoring of robbery hotspots continues and there is renewed effort to ensure recycling rates improve. The libraries improvement programme has started to show some sign of better performance. The council and its partners are continuing to monitor the effects of the current economic climate.

Transparent information on the shortage of school places in Brent and London-wide is a priority and early response to complaints about lack of school place is a key factor.

#### Service area comments

At the end of December 2010, 252 children were subject to Child Protection Plans representing a 2% increase on the position at the end of September 2010, this also represent a 6% increase from the end of June 2010. The current numbers of children subject to CP Plans is on par with the highest numbers during the last year. In July 2010, 252 children were subject to CP Plans.

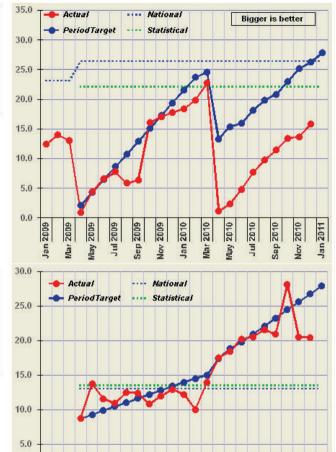

During the period 59 children became the subject of CP plan and 35 children ceased to be subject of a CP plan.

Service unit manager comments

The targets were seasonally profiled based on historical data: however, the removal of government funding for free swimming part way through the year (Aug 2010) means that these profiles may not now be appropriate. We are currently still above the year to date target and are likely to meet the overall annual target, although clearly the removal of this funding along with the impact on the recession on the take up of gym membership and on general leisure centre use mean that the target is now more ambitious than was originally envisaged at the time it was set.
