Vital Signs Performance Digest

Blank page

Glossary page for Vital Signs.

A more complete glossary and list of protocols for Performance Plus can be found on the intranet help page.

-  'Medium risk' performance indicators: this means target is not being met but performance is within set tolerance of the target
-  'High risk' performance indicators: this means target is not being met and performance is not within set tolerance of the target

Foreword

The Vital Signs Performance Digest is part of the high level performance monitoring carried out by Members and senior management of Brent Council. The digest is published quarterly and aims to provide useful information on how well Brent is performing against key indicators. The indicators reflect areas critical for Comprehensive Area Assessment (CAA), all of the targets negotiated as part of the council's Local Area Agreement (LAA) which attract a Performance Reward Grant at the end of the LAA, and any others that are high risk to the council.

High and medium risk monitoring

For each performance indicator that has been identified as high or medium risk (that is not reaching target), more information is provided.

This section includes a graph tracking performance over time against target, comments from the Lead Member and Service Director/Manager, and plans for improvement with actions and time frames.

Vital Signs Performance Digest

Vital Signs

Local Area Agreement

Overview

Vital Signs risk analysis

Overall council has made some progress towards delivering the key objectives in the Corporate and Community Strategies in quarter 3. However, performance has declined this quarter with low risk indicators down by 6% on last quarter and indicators with no data reported more than doubling.

Areas of continuing risk are needs assessments and carer services, the shortage of school places and suitable foster care places, streetcare and knife crime. There is an ongoing transformation programme being implemented in adult social care to improve performance and the current waste management contract is being reviewed. The council and its partners are continuing to monitor the effects of the current economic climate and through the ongoing transformation programme will outline individual improvement measures accordingly.

Overview

Local Area Agreement risk analysis

Overall progress of the best performing LAA indicators has stagnated this quarter and the overall percentage of low risk indicators has decreased by 3%. The number of high risk indicators has also decreased by 11%, increasing the overall percentage of medium risk indicators by 14%. Of those priorities failing to achieve target, several are at risk of not achieving target in the long term. Performance will need to significantly improve to achieve any of the performance reward grant and to reflect positively on Brent's current partnership under the Comprehensive Area Assessment.

Key risks to delivery remain the same, notably the impact of the economic climate and the lag in data and relevant information to effectively monitor performance in some areas. The Strategic Leads Group and the Local Strategic Partnership are working to address poor performance and individual improvement measures are outlined in the main report.

One Community

One Community overview

Vital Signs risk analysis

Key risks this quarter include the impact of the current economic climate on housing needs in the borough, the supply of school places versus demand, and the need for local foster placements. Work is underway to increase the provision of school places across the borough, although this is a London-wide problem and is being addressed across the city. Adult and childrens social care are in the process of implementing transformation programmes to help deliver local services more effectively and thus improve performance.

Important indicator of quality of service

Service Area Comments

The overall ratio of social workers who are permanent in the locality service has improved since January 2009. The locality social work teams were the ones that were worse affected by an exodus of permanent staff in Dec/Jan and this service started with only 30 of its social workers as permanent. These improvements are attributable to the renewed advertising campaign combined with the £4,000 golden hello being offered to staff joining the locality teams.

Current Total Senior Social Workers & Social Workers in Social Care including the Disabled Children's Teams - 76.32%

Current Total Senior Social Workers & Social Workers in Social Care excluding the Disabled Children's Teams - 74.89%

Key Improvement Actions
 Complaints team is now reminding managers more frequently of overdue complaints. It should also be noted that whilst work undertaken to improve handling of social care complaints has had little effect on timeliness to date, it has reduced the number of complaints outstanding and does appear to have significantly reduced escalation rates.

o Heads of Service / Principal Officers and Complaints Manager continuing to work to improve timescales and quality of responses.

Social Care

A Great Place overview

Vital Signs risk analysis
 Key risks for the council include continuing pressures on budgets due to the current economic climate, increasing gun and knife crime and the slow progress of the waste and recycling contract. The impact of the recession is being closely monitored by the council and there is a transformation programme in place to improve the performance of the waste and recycling service.

⊕ NI195c Improved street and environmental cleanliness (graffiti)	12.13	7.00	▲

NI195c Comments
<p>Latest Comments</p> <p>Report comment</p> <p>The long term trend for graffiti performance continues to be an improving one.</p> <p>The borough score is let down by the amount of graffiti on "Other Highways" (alleys, subways, and the like), which is often over 45% failure rate (63% in the last tranche), while main highways are around the 6%-15% mark. This drags down our score. These other highways do not generally appear on inspection regimes.</p> <p>In response, we are identifying where the other highways are, and targeting cleansing activities in these areas. We should be aware that they are not all public highway, and may belong to different agencies, such as TfL, Network Rail or BHP. We will be talking with the agencies where appropriate through the Graffiti Partnership Board.</p> <p>We continue to apprehend taggers and take them through agreed</p>

Vital Signs – A Great Place

Local employment and enterprise			
	Actual	Target	Alert
NI196 Improved street and environmental cleanliness - fly tipping	3.00	2.00	▲

NI196 Comments	
Latest Comments	
Report comment	Reported numbers of flytips continue to fall. If current trends continue, reported flytips will be about 9% lower than 08/09. This reduction is not fully captured in the month-by-month flycapture calculation, which needs year end figures and a definite >5% reduction.
	In terms of the enforcement actions, we are issuing fewer warning letters and FPNs due to greater compliance. This is a positive result of the inspection regime of businesses. However, these two enforcement actions have greater weighted scores in the Flycapture calculation, and show us having decreasing actions. While in reality this is a good thing, the combined result of reducing flytips and reducing enforcement actions gives us a rating of "Not Effective" (level 3).

A Borough of Opportunity overview

Vital Signs risk analysis
 Key risks in this quarter include continuing poor performance in the timeliness of social care assessments and the number of vulnerable adults being supported to live independently through social services. The adult social care transformation programme is in place to improve performance through effective service delivery. In addition, the council and its partners are continuing to monitor the effects of the current economic climate on council services.
