Dear Mr Thevarajah,

**Premises: Carlton Lounge, 232-234 Kingsbury Road, London, NW9 0BH**  
**Application Ref. 223235344**  
**Date/times: 25/12/2014, 00.00-06.00**

As with your previous application (ref: 223235352/ New Year's Eve Party), the conditions for this application are the same, please see below and respond.

The Nuisance Control Team representations are primarily concerned with the prevention of public nuisance. I certify that I have considered the applications shown above and **I wish to make representation** that the likely effect of the grant of the applications is detrimental to the licensing objectives.

The primary reason is the close proximity of the local residential properties surrounding the premises and the likely impact on the local residents from the proposed activities. Furthermore, the Council has received 5 complaints from local residents regarding noise from events that took place between 06/05/2013 - 30/07/2014.

However, I recommend adherence to the following conditions which should assist with mitigating potential for noise nuisance:

1. No noise or vibration arising from the activities on the premises shall be detectable at any neighbouring noise sensitive premises.
2. All doors and windows will remain closed during the licensed activities. Where a door is used for patrons to enter or leave the premises the door will either be fitted with a self-closing device and staff told to ensure that it is not propped open or a member of staff shall be positioned at the door to ensure it is opened for as brief a period as possible.
3. The licensee shall ensure that no music played in the licensed premises is audible outside. Music is not to be played outdoors. This condition applies to both amplified recorded music and live performances. A site supervisor will actively monitor the music/noise levels at the boundary of the premises and inform management and/or take appropriate action to remedy the issue immediately.
4. Staggered dispersal of patrons is recommended due to the surrounding residential properties and considering the lower background levels late at night and during the early hours of the morning. When the premises turn out a door supervisor shall supervise patrons and ensure they leave and enter in a prompt and courteous manner, respecting the neighbours
5. Licensed door supervisors and shisha area staff are to actively monitor the smoking and shisha areas to control the number of patrons using these areas and ensure any noise from them do not cause disturbance to local residents.

Please read the conditions set out above and **respond by replying to this email** to confirm whether or not you agree to abide by these conditions throughout the duration of your proposed event. Please note your application will not be granted unless this confirmation is received by the Nuisance Control Team.

**Other comments:**

The Nuisance Control Team will actively monitor the event and investigate any noise complaints received. If the noise is witnessed at a statutory nuisance level, a noise abatement notice will be served on the Licensee. Subsequent breach of the notice will result in prosecution which can lead to a maximum fine of **£20,000**.

The Licensee is reminded that persistent noise complaints may provide grounds for a licence review and may jeopardise approval of future TEN applications.

Regards
