## BRENT CYBER SECURITY STRATEGY 2022-2026: IMPLEMENTATION PLAN

| Ref# | Priority | Action   | Owner  | Details  | Due Date |
|------|----------|--|--|--|----------|
| 1-a  | DEFEND   | Implementing firewalls and scanning services   | Chief Security<br>Officer                                | Firewalls are in place both externally and between zones. Work is on-going to ensure all rules have a business case and are documented.  | Apr-24   |
| 1-b  | DEFEND   | Carrying out health checks, penetration test and cyber resilience exercises to test their systems and processes  | Chief Security Officer/Information Governance Lead       | Health checks are carried out annually as part of the submission for Public Sector Network (PSN) code of connection. Web check from the National Cyber Security Centre (NCSC) is configured and in use.  We further use early warning from the NCSC, which allows us to receive notifications of malicious activity and help investigate attacks on network quickly. | Apr-24   |
| 1-c  | DEFEND   | Meeting<br>compliance<br>regimes, e.g. PSN,<br>PSI and the Health<br>and Social Care<br>Network  | Chief Security<br>Officer/Information<br>Governance Lead | <ul> <li>PSN next submission due</li> <li>May 2024</li> <li>NHS Data Security</li> <li>Protection Toolkit (DSPT) next submission due June 2024</li> <li>Payment Card Industry (PCI)</li> <li>Compliance next quarterly scan due August 2023</li> </ul>   | Aug-22   |
| 1-d  | DEFEND   | Working with partners across the public sector through participation in Cyber Security Information Sharing Partnership (CiSP), Warning, Advice and Reporting | Chief Security<br>Officer                                | STS is an active member of the local warning advice and reporting (WARP), Information security for London (ISfL) and Information Governance for London (IGFL).  STS is currently considering options for improving the shared Service Security Operation Centre (SOC) to monitor, prevent, detect, investigate, and respond to cyber threats around the clock.       | Nov-23   |
| 2-a  | DETER    | Network Security - Protect the networks from attack, Defend the network perimeter, filter out unauthorised access and malicious content.                     | Chief Security<br>Officer/Information<br>Governance Lead | Applying Government's     Cyber Security Guidance     10 Steps to Cyber Security     Cyber Essentials  | Apr-24   |

|     |       | Monitor and test security controls.   |  |   |         |
|-----|-------|---|--|---|---------|
| 2-b | DETER | Multi - factor authentication shall be used where technically possible, such as where administrative consoles provide access to manage cloud based infrastructure, platforms or services. Multi - factor authentication shall be used for access to enterprise level social media accounts. | STS  | Where VPN and Remote Desktop Proxy (RDP) are in use, Single Sign-on (SSO) or Multi Factor Authentication (MFA) is to be used. The majority of staff working from home do so from securely configured Windows 10 laptops using direct access technology. The windows image used is checked as part of the annual IT health check. A Data Protection Impact Assessment (DPIA) to be carried out on all new systems/tools. | Apr-24  |
| 2-c | DETER | Incident management - Establish an incident response and disaster recovery capability. Test your incident management plans.   | Chief Security<br>Officer/Information<br>Governance Lead | Run books have been developed with more to be created to address cyber incidents. Cases are managed through the current ITSM system.  | Dec-23  |
| 2-d | DETER | Monitoring - Establish a monitoring strategy and produce supporting policies. Continuously monitor all systems and networks.  | Chief Security<br>Officer                                | Various monitoring is used across the estate, STS have an external Security Operations Centre (SOC). STS are continuously assessing opportunities for improvement.  | Apr-24  |
| 2-e | DETER | Secure configuration - Apply security patches and ensure the secure configuration of all systems is maintained. Create a system inventory and define a baseline build for all devices.  | Chief Security<br>Officer                                | Currently all server and end user compute builds are created using a standard format. Tools and techniques to ensure that configurations are maintained over time are being investigated. This will be done via a 3rd party tool and using Microsoft features to ensure secure configuration to minimise the attack surface.  | Apr-24  |
| 2-f | DETER | User education and awareness - Produce user security policies covering acceptable and secure use of your  | Chief Security<br>Officer/Information<br>Governance Lead | User education has been enhanced by the use of phishing simulations. Guidance has been published on the intranet to not only guide staff at work, but also provide advice on technology at home - such as the NCSC  | Monthly |

|     |         | systems. Include in staff training.  |  | guidance on smart devices,<br>SMS and email fraud.   |          |
|-----|---------|--|--|--|----------|
| 3-a | DEVELOP | Develop and maintain risk management framework, internal control and governance for the prevention and detection of irregularities and fraud | STS/Brent IG                                       | Current STS digital risks fed through to Brent's corporate risk register.  | Annually |
| 3-b | DEVELOP | Process,<br>procedures and<br>controls to manage<br>changes in cyber<br>threat level and<br>vulnerabilities                                  | Chief Security<br>Officer                          | Vigilance is maintained by reading the weekly NCSC cyber threat reports, further evidence and advice is sought from NHS cyber alerts and through engagement with the local WARP.   | Weekly   |
| 3-c | DEVELOP | Operation of the council's penetration testing programme; and Cyber-incident response  | Chief Security Officer/Information Governance Lead | IT health checks are carried out every year as part of the PSN submission.   | May-24   |
| 3-d | DEVELOP | Introducing training<br>for staff and elected<br>members   | Chief Security Officer/Information Governance Lead | As well as the yearly training mandated for staff, more work has taken place this year on providing phishing simulations to both staff and elected members.  | Monthly  |
| 3-e | DEVELOP | Develop an incident<br>response and<br>management plan,<br>with clearly defined<br>actions, roles and<br>responsibilities                    | Chief Security Officer/Information Governance Lead | Incident response playbooks have been developed and held for specific cyber events including unauthorised access, data breach, malicious code and Distributed Denial of Service (DDOS). Excersises to be carried out with nominated services  Within the plans there are details of external parties and partners who can be contacted for help and advice. Including LGA, NCSC, | Apr-24   |

|     |         |  |  | Information Commissioners Office (ICO) and providers of cyber security tools.   |        |
|-----|---------|--|--|---|--------|
| 3-f | DEVELOP | Develop a communication plan in the event of an incident | Chief Security Officer/Information Governance Lead | Relevant Internal roles and responsibilities have been identified. The Information Governance team are working with STS to develop the plan within the incident response playbook excercises. | Dec-23 |
