# Socio Economic - Indeces of Mulitple Deprivation (IMD)

The Index of Multiple Deprivation 2007 (IMD 2007) is based on the small area geography known as Lower Super Output Areas (LSOAs). LSOAs have between 1000 and 3000 people living in them with an average population of 1500 people. In most cases, these are smaller than wards, thus allowing the identification of small pockets of deprivation. The IMD brings together 37 different indicators which cover specific aspects or dimensions of deprivation: Income, Employment, Health and Disability, Education, Skills and Training, Barriers to Housing and Services, Living Environment and Crime.

The lower score the higher the level of deprivation, schools therefore that reside in an area of high deprivation will score higher than schools in low areas of deprivation.
