Performance and Finance Quarter 4, 2009-2010

This report summarises Brent Council's spending, activity and performance in Quarter 4, 2009/10 and highlights key issues and solutions to them. It takes a corporate overview of financial and service performance and provides an analysis of high risk areas. The report is accompanied by appendices providing budget, activity and performance data for each service area, the Local Area Agreement, ring fenced budgets and the capital programme. Vital Signs trend data and graphs are also provided along with the council's overall budget summary. The report also contains details of the recent government announcements reducing various grants to the council and asks the Executive to agree action to balance the revenue budget.

(Appendices A-F circulated separately)

Date of the next meeting: Monday, 23 August 2010

Please remember to **SWITCH OFF** your mobile phone during the meeting.

- The meeting room is accessible by lift and seats will be provided for members of the public.
- Toilets are available on the second floor.
- Catering facilities can be found on the first floor near The Paul Daisley Hall.
- A public telephone is located in the foyer on the ground floor, opposite the Porters' Lodge

Risk

Libraries – The number of active borrowers is improving now that the refurbishments have been completed but at a slower rate than anticipated. Physical visits to Brent libraries remains high indicating that visits may be due to gain access to the internet and local information.

Please note that NI195 parts a, b, and c are reported every 4 months instead of every quarter. The figures are for December 2009 to March 2010.

Risk

Employment – Levels of employment in Brent are good and long term unemployment remains low risk. However, short and medium term claimant numbers are still high and continue to rise due to the current economic situation.

Please note that NIs 151, 153 and 173 have been discontinued nationally due to persistent inaccuracies noted by the Department for Work and Pensions. These may be reinstated or replaced in the future but no decision has yet been made. Until then they have been removed from the scorecard.

NI 40 data is unavailable at present (PCT) although a target has now been provided.

Risk

Delayed discharges – Brent has the highest figures in London. Additional resources are required to improve the situation.

Performance figures for NIs 141 and 142 were unavailable at the time of writing this report (Housing and Community Care).

Risk

Temporary accommodation - Central government agreement is required in order to convert temporary accommodation leases into settled accommodation.

Affordable homes – although there is a delay with the delivery of some projects this quarter this is not expected to affect the overall number of units delivered this year.

Risk

- 1. Expenditure on maintenance backlog does not include any Devolved Formula Capital. It should be noted that prioritisation of works are based on Priority 1 indications but will encompass Priority 2 and 3 works for the same elements to provide a longer term and value for money solutions. The relevant works will not be patch and mend but permanent solution to element failure
- 2. SAI works Surveys have now been carried out including VA schools.
- 3. Current Suitability Data needs updating last updated in 2006.
- 4. Maintenance backlog forecast figures do not count items that could arise during the financial year.

Risk

^{*}It should be noted that whilst the level of total maintenance backlog has reduced overall there has been a £1.3m increase in the level of Priority 1 Backlog Repairs. This is as a result of a recent survey which has identified a shift in categorisation from Priority 2 to Priority 1. It is intended that there will be a focus to address this increase during the 2010/11 financial year.

- 0
- 'Medium risk' performance indicators: this means target is not being met but performance is within set tolerance of the target

'High risk' performance indicators: this means target is not being met and performance is not within set tolerance of the target

Foreword

The Vital Signs Performance Digest is part of the high level performance monitoring carried out by Members and senior management of Brent Council. The digest is published quarterly and aims to provide useful information on how well Brent is performing against key indicators. The indicators reflect areas critical for Comprehensive Area Assessment (CAA), all of the targets negotiated as part of the council's Local Area Agreement (LAA) which attract a Performance Reward Grant at the end of the LAA, and any others that are high risk to the council.

High and medium risk monitoring

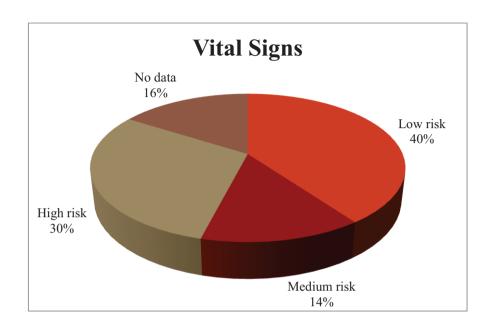

For each performance indicator that has been identified as high or medium risk (that is not reaching target), more information is provided.

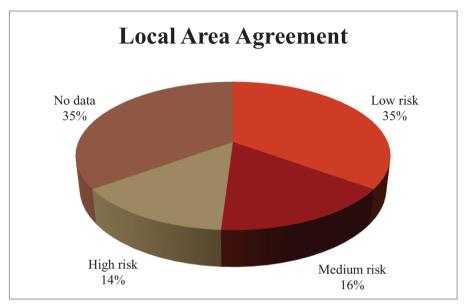

This section includes a graph tracking performance over time against target, comments from the Lead Member and Service Director/Manager, and plans for improvement with actions and time frames.

Blank page

Overview

Vital Signs risk analysis

Overall council has made some progress towards delivering the key objectives in the Corporate and Community Strategies in quarter 4. Performance has improved slightly this quarter with low risk indicators up by 5% on last quarter mainly due to improvement in indicators that were previously medium risk.

Areas of continuing risk are needs assessments and carer services, the shortage of school places and suitable foster care places, volunteering and handling complaints within timescales. There is an ongoing transformation programme being implemented in adult social care to improve performance and fostering and adopton placements are being closely monitored. The council and its partners are continuing to monitor the effects of the current economic climate and through the ongoing transformation programme will outline individual improvement measures accordingly.

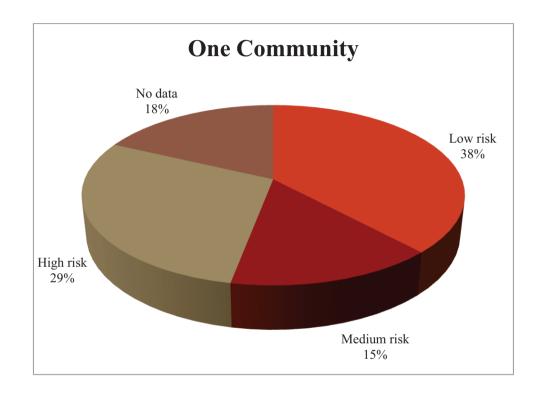

Overview

Local Area Agreement risk analysis

Overall progress of the best performing LAA indicators appears to have improved this quarter and the overall percentage of low risk indicators has increased by 3%. The number of high risk indicators has also decreased by 2%, partly due to the non-reporting of data for over a third of the total indicators in the LAA. Of those priorities failing to achieve target, several are at risk of not achieving target in the long term. Performance will need to significantly improve to achieve any of the performance reward grant and to reflect positively on Brent's current partnership under the Comprehensive Area Assessment.

Key risks to delivery remain the same, notably the impact of the economic climate and the lag in data and relevant information to effectively monitor performance in some areas. The Strategic Leads Group and the Local Strategic Partnership are working to address poor performance and individual improvement measures are outlined in the main report.

One Community overview

Vital Signs risk analysis

Key risks this quarter include the impact of the current economic climate on housing needs versus supply in the borough, the supply of school places versus demand, and the need for local foster placements. Due to the recession, there is also the added need to further support those who are unable to find suitable volunteering placements. Work is underway to increase the provision of school places across the borough, although this is a London-wide problem and is being addressed across the city. Adult and childrens social care are implementing transformation programmes to deliver local services more effectively and improve performance in the long term.

NI045 Latest Comments Key Improvement Actions

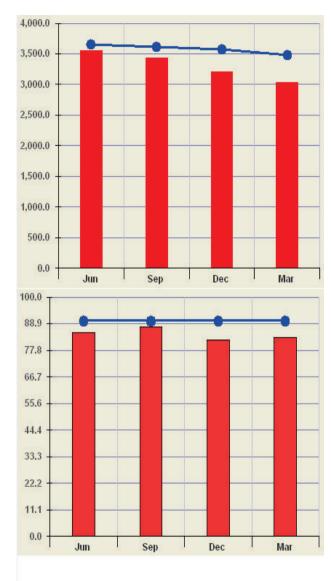

Due to the date of this report submission being early in the Quarter, it remains possible that the performance target may increase from the 82% engagement rate reported here.

Any alteration to Q4 performance will be reported to Children and Families ASAP.

NI 45 is one several KPI's vulnerable to an under reporting of performance due to simple recording errors within the Youth Offending Information Service database. In order to remedy this, YOS have introduced monthly data-cleaning afternoons for case work staff to ensure the integrity of data. Anita Dickinson

A Great Place overview

Vital Signs risk analysis

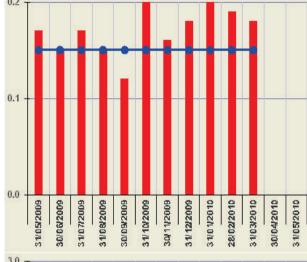

Key risks for the council include continuing pressures on budgets due to the current economic climate, graffiti and the slow progress of the waste and recycling contract. The impact of the recession is being closely monitored by the council and there is a transformation programme in place to improve the performance of the waste and recycling service.

Latest Comments

This data is provisional only. However, the combined recycling rate is still likely to be less than the 30% target. It appears that reduced dry recycling tonnages, and less waste in general, have been the contributing factor. It is clear that the compulsory recycling message will need to be reinforced and areas of low participation will need to be identified and targeted. It is also clear that the current collection systems will not be adequate to deliver a recycling rate in excess of 30%, and ceratinly not appropriate for achieving 40-50%. The Waste and Recycling Review is determining alternative methods and these must be taken up if the council aspires to a step change in recycling performance.

NI157a Comments Latest Comments Service area comments

While performance is below target for this quarter, this is part of the natural fluctuation of what is inherently a long-term indicator (it is particularly liable to fluctuate because the number of applications determined in any given quarter is relatively small). As noted last quarter, many aspects of signing off of major applications can be outside our control and be due to legal and external issues and partners, for example finalising Section 106 agreements. The indicator can more usefully be judged on a more long term basis and has met the annual target over the course of the year.

A Borough of Opportunity overview

Vital Signs risk analysis
Key risks in this quarter include continuing poor
performance in the timeliness of social care assessments
and the number of vulnerable adults being supported to live
independently through social services. The adult social care
transformation programme is in place to improve
performance through effective service delivery. In addition,
the council and its partners are continuing to monitor the
effects of the current economic climate on council services.

Key improvement actions

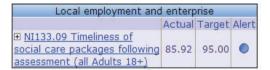

This is not a satisfactory approach and are implementing a fast tracking through to Care Management or Review Team where assessments will be completed within 28days (LD).

Service area comments

The management of CTPLD have looked at the underlying issues and it has been that many cases are being held on duty awaiting the assessment (LD).

Service area comments

The NHS target is currently 11 weeks, however it is pleasing to note that we are achieving 7 month average of 70% (MH).

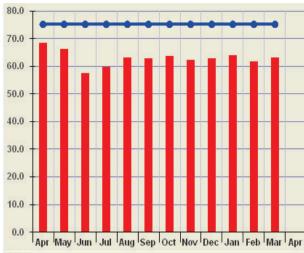

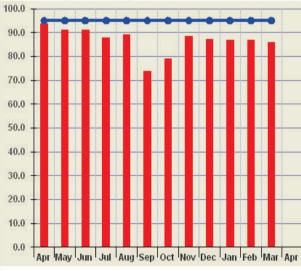

NI133 Comments Latest Comments Service area comments

Please note the NHS target for treatment following assessment is 7 Weeks, were as Brent Council is 4 Weeks, however we are pleased to achieve 86% (MH).

Service area comments

One of the key factors that has slowed the implementation of Support Plans/ Care Packages has been that as people have moved to SDs and Direct Payments there has been a need to spend more time assisting people to set up their support plan themselves. Although the CTPLD have had outreach workers/brokers to assist in this it has been on top of their normal duties, from April 1st their duties have been reduced so should see shift in this indicator going forward (LD).

NI015 Serious violent crime:

Comments

Currently, ways of making better use the DAAT team are being explored to tackle alcohol related violence with a substance misuse programme being implemented based on the lessons learn with treating drug abuse.

The former Not Another Drop steering group, has now widened its remit to look at serious violence, as NAD is about to become an independent charity and will form its own management structure. The steering group's expertise will add a further dimension to work in this area. Genny Renard.

Key actions

Many offences in this data involve domestic violence, reflective of the level of concern, this was the only work strand to receive additional partnership funding for 2010/ 2011 whilst there were drastic cuts elsewhere. Genny Renard.

NI016 Serious acquisitive crime:

Comments

Pan -London there was a spike in burglaries. This was in part, in response to action taken against street robbery as criminals change their offending patterns. Locally, a number of prolific burglars was released. The multi- agency Joint Action Group developed a plan with long and short term work and the statistics now show a dramatic reduction in offences. Genny Renard.

NI028 Knife crime rate:

Comments

The Youth Offending Team are carrying out work that challenges young people and helps them to move away from carrying knives. Genny Renard.

Key actions

This links to NIO15 and the work covers both areas. Trident type offences involving guns and knives are very low and Brent may lose its status as a Trident Focus borough, whilst this reflects all our hard work it does have implications for resources. Genny Renard.

NI029 Gun crime rate:

Comments

It has to be borne in mind that this figure now includes "perception". This is where a person fears there was a gun which inevitably distorts the data. The vast majority of gun crime is associated with robberies, especially of betting shops, one of the few outlets where cash is a certainty. Brent has an

unusually high number of betting shops. Every planning application for such shops is challenged by the Community Safety Partnership Unit and one application has been turned down. Genny Renard.
