Physical and mental health

## Respondent profile

14% have a disability

## Projects themes

N=75: 60 on the portal and 15 paper responses

NB: demographics were not collected in paper responses

# Examples of project ideas

# Notes

Some results were omitted from ranking the neighbourhood priorities however their responses to other questions were included. The omitted results are listed in the table below:

Reason for omission	Number of responses
Non Brent resident	2
Technical error experienced by respondent	2
Respondent wished for ranking to not be included	1
Duplicate entry	1
Resubmitted responses after 22 Jan*	2

\*Between 16 December to 22 January participants in the consultation exercise were asked participants to rank their priorities from 1-9. However, some participants raised a concern that there was a potential lack of clarity around 1 being the highest priority. From 22 January to 5 February, a change was made to wording of this question to make it clearer number 1 was the highest priority. An email was sent out to all respondents stating this and they were invited to change their response, 2 of which did and their original response was substituted with their updated response.
