

## ADDITIONAL PHOTOS FROM RESIDENT REP 20

Please can you add the following photos to the evidence pack:

### Photo 1

This photo shows how narrow the street is and how one delivery vehicle or car blocks access. The increased traffic from the proposed licence is a nuisance and danger due to accidents. The business will increase the amount of delivery vehicles on a street that is not designed for this activity.

### Photo2

This photo shows how residential the street is. Most of the rooms facing the street are bedrooms – so all the residents will be negatively impacted by activity late into the evening.

### Photo 3

This photo shows the blind spot on the bend of Bryan Avenue in the evening. This spot has frequent accidents and the Council have already put speed bumps into the spot to reduce the risk – but to no avail.

Here in March 2021 a delivery scooter driver clipped a car and was severely injured and we understand may have died.

Please can you confirm my text and photos are added to the pack.

Also please can other people send in photos to add to the evidence pack.
