APPENDIX 3

LOCAL DEVELOPMENT SCHEME

This Local Development Scheme is a public statement of the Council's programme for the production of its Local Plan and associated documents over the next three years. It is to be the first point of reference for local communities and other stakeholders to find out about Brent's Local Plan

JULY 2021

London Borough of Brent Local Development Scheme

Explanatory Note

Under the Planning and Compulsory Purchase Act 2004 and the Localism Act 2011, Brent Council is required to produce a Local Development Scheme (LDS). This sets the timetable and programme for the production of planning policy documentation. It is to be revised at such times as the Local Authority considers appropriate.

The LDS covers the period from 2021 to 2024. There is no longer a statutory requirement to include Supplementary Planning Documents (SPDs). These however, continue to be listed in order to give a full account of Brent's planning policy work priorities. A summary of progress on Neighbourhood Plans is also included in the appendix.

This and other Local Plan documents are available online at www.brent.gov.uk/localplan.

1.0 INTRODUCTION

- 1.1 This Local Development Scheme (LDS) is the Council's planning policy project plan. It explains the current planning policy documents for the borough. It also outlines which local development documents will be progressed to update and supplement the borough's Local Plan for the next three years. It has been prepared in accordance with the requirements of the Planning and Compulsory Purchase Act 2004.
- 1.2 This scheme does not include planning policies but is to be used to find out which policy documents apply in the borough and their status. If there are any ad-hoc changes to the production of any documents, these will be published online at www.brent.gov.uk/localplan.

2.0 OVERVIEW OF THE LOCAL PLAN PROCESS

- 2.1 The following are the key aspects of the development plan system as they relate to LB Brent. The statutory development plan for the borough consists of:
 - (i) London Plan 2021;
 - (ii) Brent Local Plan incorporating the Core Strategy July 2010, the adopted Site Specific Allocation July 2011, Wembley Area Action Plan January 2015; Development Management Policies Plan adopted 2016 and
 - (iii) West London Waste Plan July 2015
 - (iv) Sudbury Neighbourhood Plan September 2015
 - (v) Harlesden Neighbourhood Plan May 2019
- 2.2 Since April 1st 2015 the Council is not the local planning authority for some south west parts of the borough. In this area Old Oak and Park Royal Development Corporation (OPDC) is the local planning authority. For this area all documents Local Plan documents adopted by the Council are part of the development plan. The exception is the Development Management Policies Plan. The OPDC produced a draft Local Plan in October 2018 which is subject to an ongoing examination process with an aim to adopt in Autumn 2021.. Once adopted, the Brent Local Plan will no longer apply in that area. See appendix 1 for the OPDC area and its coverage in the London Borough of Brent.

Structure

2.3 The terminology around planning can be confusing with different terms used for the same documents used in legislation and guidance. The Development Plan or Local Plan as it is also known is a portfolio of planning documents. Government regulations and guidance set out the process for preparing the documents. The preparation of the Local Plan has for the last decade taken place at different times for different documents that comprise the portfolio. This reflects guidance and national practice associated with the 2004 Planning and Compulsory Purchase Act. It should also be noted that the process for preparing documents has changed with the National Planning Policy Framework first published in 2012, Localism Act 2011 and Town and Country Planning (Local Planning) (England) Regulations 2012. Government has moved its preference

away from the portfolio approach. Local Planning Authorities are now encouraged to decide on the Plan format that suits an individual area. This can be either a portfolio or a single document. The following text gives a description of the types of documents in the Local Plan and a short description of each.

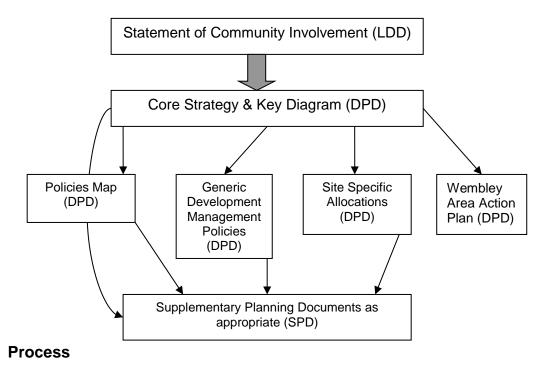

Local Development Documents

- 2.4 The 2004 Act identified two different types of Local Development Documents (LDDs) that can be used by Local Planning Authorities to set out policy and associated guidance that can be used to determine planning applications. These are Development Plan Documents and Supplementary Planning Documents. All local development documents are, where necessary, subject to sustainability appraisal and a strategic environmental assessment:
 - Development Plan Documents (DPD) Planning applications must be determined in accordance with the Development Plan, or Local Plan; this is also known as a Development Plan Document. As they form part of the Development Plan these documents have statutory status. They are subject to independent examination undertaken by the Planning Inspectorate appointed on behalf of the Secretary of State. These appointed can recommend changes, which the Council must accept if they are to adopt the Plan. The key DPD in Brent's Local Plan is the Core Strategy, which sets out an overall vision of how the borough and places within it should develop. Other DPDs can include Area Action Plans, generic Development Management Policies documents, Site Specific Allocations and a Policies Map. DPDs must be in general conformity with the London Plan.
 - Supplementary Planning Documents (SPD) these documents do not have development plan status but provide guidance on the application of DPD policies. Whilst there are regulations and guidance about what they can contain and the processes for their adoption they do not form part of the Local Plan and so are non-statutory. Supplementary Planning Documents amplify policies in Local Plans; they cannot create policy and neither can they allocate sites for development.

Other planning documents the Council has to produce

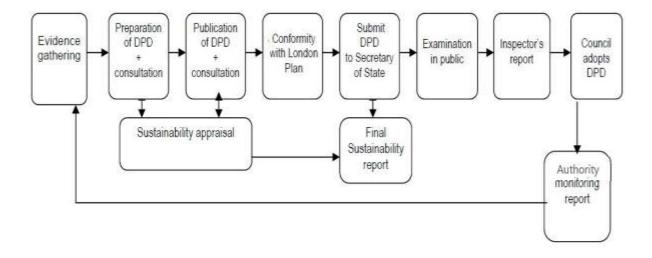

- Authority Monitoring Report (AMR) sets out progress in terms of producing LDDs and in implementing/monitoring the effectiveness of policies. It is done on an annual basis.
- Statement of Community Involvement (SCI) sets out how Brent Council intends to involve stakeholders and the community as a whole in the Local Plan process, as well as their involvement with planning applications.

Figure 1 Brent's Local Plan and associated documents.

2.5 The diagram below sets out the key stages in the production of the local Plan/DPDs.

Figure 2 - Key stages in the production of Development Plan Documents

- 2.6 The key stages of **DPD preparation** are highlighted below, which accord with the Town and Country Planning (Local Planning) (England) Regulations 2012:
 - The research stage evidence is gathered to help identify issues that need
 to be considered to shape the DPD strategy. Brent will need to collect the
 necessary data to develop a robust evidence base for the plan and provide
 the baseline for a Sustainability Appraisal (SA) scoping report.

- Preparation of a local plan (Regulation 18) When preparing a DPD, the
 Council must notify each of the specific bodies as relevant, alongside
 members of the public, stakeholders and interest groups. At this stage, the
 possible need to include proposals for particular sites will be considered and
 an initial sustainability report will also be available.
- Publication of a local plan (Regulation 19) Before the Council submits
 a DPD to the Secretary of State, it must publish and make available the
 documents it proposes to submit. At this stage, a minimum of a six week
 period is allowed for any member of the public, group or stakeholder to make
 representations on the soundness of the document. The Local Development
 Document will be supported by the Sustainability Appraisal.
- Submission of the documents and information to the Secretary of State (Regulation 22) – The council will set out the detailed policies and proposals and will submit the DPD to the Secretary of State, together with any representations received in accordance with Regulation 20. The final sustainability appraisal will accompany the DPD.
- Independent Examination (Regulation 24) an examination will take
 place by an independent Inspector appointed by the Secretary of State. The
 Inspector must consider whether the document is sound in terms of its
 content. They must also identify whether the correct processes and
 procedures have been followed taking into account representations
 received through an Examination in Public.
- Inspector's Report and Adoption of local plan (Regulations 25 and 26)
 Following examination, the Inspector will produce a report to identify whether the Plan is sound and can be adopted. If asked by the Council to do so, the Inspector will make recommendations on main modifications necessary to make the DPD sound. If the Council wishes to adopt the final DPD the Inspector's modifications must be incorporated.
- Authority Monitoring Report (Regulation 34) The council must make any up-to-date information, which they have collected for monitoring purposes, available as soon as possible after the information becomes available.

Figure 3 - Key stages in the production of Supplementary Planning Documents

2.7 The preparation of Supplementary Planning Documents is different to that of DPDs. Their preparation is a simpler process than that of DPDs and does not involve an Examination in Public by an Inspector. The Council is responsible for the process throughout, but there is still community involvement.

3. 0 BRENT'S LOCAL PLAN

Introduction to the current situation in Brent

3.1 The Planning and Compulsory Purchase Act requires the Local Development Scheme (LDS) to be revised as such times as the Local Authority considers appropriate. The Council last updated its LDS in January 2017. As the draft Brent Local Plan is nearing the end of its Examination process, it is considered appropriate for an update. The key project plan changes and document profiles are highlighted in Appendix 2.

Brent Local Plan – conformity and integration with other plans and strategies

3.2 One of the main changes under the new planning system is a shift in focus from the regulation and control of the use of land to a more spatial approach. This requires a move away from dealing with strictly land use matters, taking account of other strategies and plans for the borough which have an impact upon spatial development. There are a number of strategies, plan and policy guidance that need to be considered and where necessary, integrated into the Local Plan.

National/ Government Planning Policy

3.3 The Government sets out national planning policy in the National Planning Policy Framework (NPPF). There is also associated National Planning Practice Guidance. Both are updated on a regular basis. The Local Plan must be in conformity with the NPPF, taking account of local circumstances.

The London Plan and related guidance and strategies

3.4 The London Plan is the spatial expression of the strategies of the Mayor and the organisations he is responsible for, including Transport for London. It is part of the statutory Development Plan for the borough, and Brent's Local Plan must be in general conformity with it. The London Plan has a number of related strategies and guidance, including Supplementary Planning Guidance on a variety of topics (e.g. affordable housing). The latest is London Plan March 2021.

Other local partnerships and strategies

- 3.5 The Council also has a number of other strategies and plans in the borough which the Local Plan must take account of.
- 3.6 The Council also has to take account of the outputs of Neighbourhood Planning and reflect these in its Local Plan. Neighbourhood Plans must be in conformity

with Local Plan strategic policies and as they are part of the Development Plan Brent's Local Plan must take account of Neighbourhood Plans.

4.0 EXPLANATION OF PROPOSED PROGRAMME FOR BRENT'S LOCAL PLAN

- 4.1 Appendix 2 sets out the overall programme of the proposed Local Plan for the London Borough of Brent up to 2024 and a Gantt Chart is also available for viewing at Appendix 3.
- 4.2 The focus will be on taking forward the replacement of Brent's Local Plan in the parts of the Borough where the OPDC is not the local planning authority. In addition, the Council will prepare new SPDs where it considers it necessary. These together with their timetable are shown in Appendix 2 and 3. Others will be updated as and when resources allow.

5.0 LOCAL PLAN STRUCTURE

5.1 The existing Local Plan structure has been set out above. This will be replaced by a single Local Plan document which incorporates a Vision and Good Growth Objectives for the development of Brent. It divides the borough into seven 'places which include sites allocated to deliver that vision. Development management policies on specific topics to provide a finer grain of detail for the determination of planning applications. See Appendix 2.

6.0 MONITORING AND REVIEW

- 6.1 This section identifies how monitoring and review is occurring, including the AMR and resultant annual review of the LDS; the resources (in broad terms) to be allocated to producing the Local Plan; arrangements and responsibilities for programme management and a risk assessment including any proposed contingencies.
- 6.2 Review, monitoring and survey are crucial to the successful delivery of the Local Plan's visions and objectives, and should be undertaken on a continuous proactive basis. By surveying external trends and outcomes, the Council can build strong evidence bases to inform the preparation of LDDs. Effective monitoring is crucial to the development of Local Plans. Its role is already recognised in terms of the 'plan, monitor, and manage' approach:
 - **Plan** making decisions in the Local Plan about the scale, location, and nature of future development;
 - **Monitor** putting in place a system to measure whether actual events are contributing towards the objectives in the Local Plan; and
 - Manage adjusting the plan to reflect findings of monitoring.
- 6.3 The Council are required to review actual LDD progress compared with the targets and milestones in the LDS, and produce an AMR. In addition, we need to monitor Local Plans in terms of:

- Assessing the extent to which external trends and progress with delivery reflects Local Plan policies. This is an important means of assessing the effectiveness of policies to deliver housing. LPAs are required to provide information on dwelling completions;
- Policies, targets and milestones being sufficiently clear and focused so as to be capable of quantitative assessment through indicators;
- Informing development management decision-making. Monitoring has an important role to play in terms of implementing criteria-based policies that are responsive to changing circumstances; and
- Recognising national and regional policy objectives and targets. Local monitoring systems need to be sufficiently comprehensive to respond to wider requirements.

The Authority Monitoring Report (AMR) and implementation of the LDS

- 6.4 The Council is required to prepare AMRs to assess the implementation of the LDS, and the extent to which policies in LDDs were achieved. In terms of implementation, AMRs review the actual plan progress over the year, compared to the targets and milestones for LDD preparation set out in the LDS. This assesses:
 - Whether the Council has met the LDD targets and milestones, is on target to meet them, was falling behind schedule or did not meet them;
 - If the Council is falling behind schedule or had failed to meet a target or milestone, the reasons for this; and
 - Updates the LDS in light of the above, and the necessary steps and timetable.

Monitoring

- 6.5 In terms of policy achievement, the Council will need to develop robust monitoring systems to judge the effectiveness of LDDs. For the purposes of the AMR, this will include assessing:
 - Whether policies and related targets or milestones in LDDs have been met or progress is being made towards meeting them. Or, where they are not being met or on track to be achieved, the reasons why;
 - What impact the policies are having on national, regional and local targets and any other targets identified in the LDDs. These will also have regard to the National Indicators and Brent's key priority indicators;
 - Whether the policies in the LDD need adjusting or replacing because they are not working as intended or are not achieving sustainable development objectives; and
 - If policies or proposals need changing, suggested actions to achieve this.

Indicators

- 6.6 Crucial to monitoring is the need to set appropriate indicators to monitor actual progress against targets. In line with regional monitoring, there should be an objectives-led approach to Local Plan monitoring which:
 - Ensures clear links from objectives through to policies, implementation programmes and to output targets and related indicators;
 - Focuses on key objectives rather than monitoring a wide range of indicators not directly relevant to policy performance;
 - Provides sufficient consistency in terms of local authority monitoring approaches as to enable comparisons to be made;
 - Allows transparency and accountability in terms of delivery; and
 - Facilitates more informed policy and decision-making. These will reflect the national indicators where appropriate.

Risk Assessment

6.7 In preparing the Local Development Scheme, it was found that the main areas of risk relate to:

Further disruption by the Covid-19 Pandemic The likelihood and effects of this is are unknown. There has been rapid progress in vaccination rollout and an associated lifting of restrictions. The risk of rapid transmission of variants remains. Risk overall is likely to be greater in winter when activities are concentrated indoors and transmission potential increased. As has previously been the case this could result in significant and swift changes to national policy and guidelines disrupting normal activities.

Other priorities Diversion of staff resources away from the work programme identified. The adoption of the Local Plan is a corporate priority, so this is considered unlikely to have significant potential.

The capacity of the Planning Inspectorate (PINS) and other external agencies to cope with the nation-wide demand. This is low risk as the Plan has predominantly passed through the majority of the examination process.

The "soundness" of DPDs This risk is likely to be low now that the Plan is nearing the end of the examination process.

Legal challenge This will be minimised by ensuring that DPDs are "sound" and founded on a robust evidence base and well-audited stakeholder & community engagement systems.

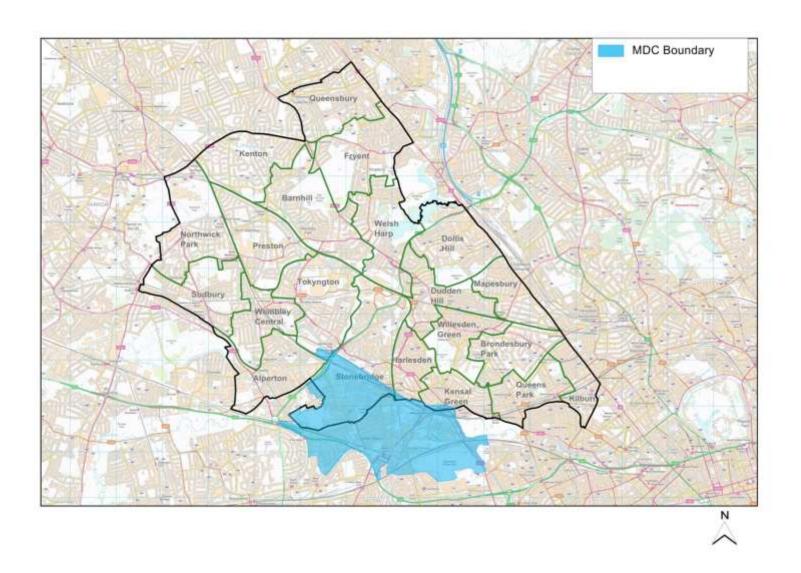

Programme slippage This will be minimised with some contingency time built into the later part of the programme.

Rolling Programme

6.8 Documents will be replaced/ updated as necessary as identified by the AMR or more informal review mechanism if appropriate before that time. Any

changes deemed necessary as a result of the AMR, or other assessment, will be reflected in the production and submission of a revised LDS.
