

Brent ICP - Who are we and who are our Partners

Brent Borough Based Partnership has been established to bring together the NHS, Brent Council, our voluntary and community sector, and local citizens to improve health and care outcomes for all the people of Brent. The partnership does not replace or merge organisations in to a single organisation, but will **bring together organisations and teams to work more effectively together around a shared purpose.**

Key principles behind our partnership:

1. Everything we do should have the resident at its heart.
2. We cannot tackle the current or future challenges of the health and care system as individual organisations, we must work together.
3. We will work with our communities to understand what matters to them, and to prioritise changes that will have the biggest impact on both their outcomes and for the sustainability of the health and care system.

our Primary Care Networks (PCNs), GP practices, pharmacies, voluntary & community sector partners and local communities.
