

**Full Council – 21 November 2022**

**Conservative Group Motion**

**Measures to tackle Flooding in Brent**

In the past few years, flooding in Brent and other areas is getting more frequent and severe. Whilst this is partly due to climate change and global warming, it also reflects the massive level of regeneration, development and building on green and brown fields sites which is detrimental to the drainage of rainwater and it is felt future planning policy must reflect.

We are losing more green and open spaces which used to soak up the rain water. The Council's policy of tarmacking footpaths also does not allow water to permeate in the ground. Just a little rain and we observe streams of water flowing on the roads and pavements.

We notice that flood water collects in low lying areas and does not recede for a few days after it rains which means that in the current situation more frequent and severe flooding will take place.

We appreciate that Brent alone cannot stop global warming and climate change and recognise that the borough has a Flood Risk management Strategy in place, however we can take further steps to mitigate the consequences and protect our residents' lives and property.

As a result this Council calls on Cabinet to:

- 1) Reverse the policy of tarmacking the footways and replace with paving slabs and bricks which allows more water to soak in the ground, especially in known flood risk areas;
- 2) Reverse the policy of large scale developments which are reducing the green open spaces and making Brent a concrete jungle;
- 3) Implement a regular gully cleaning and leaf collection program, especially in the flood prone areas;
- 4) Implement a regular program of inspecting all drains and gullies in areas identified as flood risk and repair as necessary and the Council's responsibility, including Brent's brooks and rivers;
- 5) Introduce a policy that makes it's illegal to concrete over the whole of a rear garden as this also impedes the draining of rainwater. We suggest a maximum of 20% of the rear garden can be paved or concreted over.

If Brent is serious about global warming and climate change and wants to protect its citizens now and for future, it's the least it can do.
