Treasury Management Indicators

Security

The Council has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit rating of its investment portfolio. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc) and taking the arithmetic average, weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

Credit Risk Indicator	30/09/2022 Target	30/09/2022 Actual
Portfolio average credit rating	A	A+

Liquidity

The Council has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount of cash available to meet unexpected payments within a rolling three-month period, without additional borrowing.

The Operational Boundary for External Debt is not a limit and actual borrowing can vary around the boundary. The Operational Boundary acts as an early indicator to ensure that the Authorised Limit is not breached.
