

Hi, I would like to object to the increased opening hours, increased times that live and recorded music can play until, and the removal of conditions that windows/ doors must be closed during loud live and recorded music. This is on the grounds of prevention of crime and disorder (largely disorder) and prevention of public nuisance. We live extremely close to the venue on this very residential road. our bedrooms are at the front of the neighbouring property and on the ground floor so very close. There is already a large amount of noise, disruption, disorder and litter from the venue - particularly on match days and when there is live music. I appreciate they need to run a business - but object to this being pushed to even later in the night when we are trying to sleep. Patrons loiter for a long time after closing. The main exit/ entrance used is onto the residential road - not the high road. And it is also the residential road where people hang around to smoke. This being later and later and with increased noise and level of alcohol would create substantial disturbance. I worry it would be unbearable given the level it is already at now.

---

Hello

Thank you for your response.

My concerns remain the same if the first-floor function room plans are varied. Having increased activity with more capacity later will mean more noise and anti-social behaviour.

Many Thanks
