

ENVIRONMENTAL HEALTH  
**MEMORANDUM**  
LICENSING CONSULTATION - MEMO

**To:** Mr Sam Edward Robbin-Coker (serckwani@hotmail.com)  
**From:** Jennifer Barrett  
**Cc:** hsl@brent.gov.uk  
**Date:** 06/12/2012

**Premises:** Granville Youth & Community Centre, 80 Granville Road, London, NW6 5RA

**Type of Application:** TEN

I would like to confirm that I have considered the above proposal with regard to the prevention of public nuisance. On behalf of the (Safer Streets) Environmental Health I OBJECT to the application on the following grounds:

1. That the proposed operating hours are inappropriate due to the close proximity of residential dwellings.
2. The noise caused by patrons exiting the premises, particularly with respect to door management and dispersal of patrons, and appropriate arrangements for securing suitable transport home is likely to be detrimental to the residential amenity. It is my understanding that you intend to cater for 220 patrons rather than the 100 stated in your application.
3. There is no operating schedule addressing how the applicant will promote the prevention of public nuisance from regulated entertainment.
4. The premises is not capable of containing regulated entertainment noise

**Supporting Information**

Safer Streets inspected the premises in 2010 and established that the fabric of the building; especially the windows, doors and roof covering was unsuitable to prevent noise egress, especially from amplified music and entertainment. Despite our recommendation to the operators to upgrade acoustic weak-spots no sound insulation works have been undertaken.

Safer Streets continues to receive complaints of noise disturbance from amplified music at this venue. We are in on-going dialogue with the operators to take action to prevent further nuisance from use of the venue for amplified entertainment and await confirmation of the date sound insulation works will commence.
