Subject: RE: New premises licence application 30575 - Alperton

To whom it may concern,

As one of the Councillors for Alperton ward, I am writing to oppose the granting of a New Premises License for the following business:

Name of Premises: Flaming Indulge

Address of Premises: Kitchen 13, 26A Abbey Manufacturing Estate, Mount Pleasant, HA0 1NR

Application Details: The applicant has applied for the following licensable activities:

Licensable Activity	Days	Times
Late Night Refreshment	Monday - Sunday	23:00hrs to 03:00hrs

This committee may recall my objection to the granting of a New Premises License last December to a neighbouring business, **Indulge, Kitchen 11, 26A Manufacturing Estate, Mount Pleasant, HA0 1NR**. I stated the following at the time:

“Residents, who live close to the Manufacturing Estate, have shared with me their concerns about having another business offering late night refreshments. There is the potential for a further increase in local traffic and noise from customers and delivery divers visiting the premises and disturbing residents. Also, there is the potential for the disposal of food packaging and and/bottles in the street and surrounding areas causing additional distress to residents.

In view of these potential difficulties to the residents, I do not see how the residents would benefit from the granting of this application and would therefore urge you to reject it”.

My purpose in using my previous objection to this new application from Kitchen 13 is because the issues highlighted remain the same. In addition, I have had correspondence from residents to say that they do not feel safe when they see customers waiting to collect their food and then eating the food outside their homes. They have also highlighted seeing empty food cartons littering their street, from customers of these businesses. This cannot be allowed to continue and get worse.

Officers from the Council have had to be involved in responding to complaints from residents about the effects of these premises. Granting an application to this new business would mean that the Council will have to continue to deploy additional resources to manage the consequences of these types of businesses setting up close to a residential area.

I strongly object to the granting of a new premises license to this business.

Kind regards,

Cllr Anton Georgiou
Liberal Democrat Councillor, Alperton

Leader of the Liberal Democrat Group
London Borough of Brent
