

08-04-2025

I definitely object this application. There are already many so called ghost kitchen around the back of Woodside end. We already have to put up with car parking across our driveways while waiting for their food to be brought to them, many will then eat in their cars and then either just throw their rubbish out the window or they will come on to our property and throw their rubbish/left over food in our bins resulting in some resident having to go throw their bins because things are in the wrong bin. As I personally don't feel safe when returning home late and not being able to access my drive because someone is parked across it. Also not to mention the unsocial noise, loud talking, music playing from the cars and previous I have whiteness grown men playing football in the road late at night while waiting for food. I have a child who has been woken up/kept awake due to the noise outside. Allowing this would result in our end of Woodside end becoming an even bigger hot spot for antisocial behaviour than it already is. And even more rats roaming due to food/rubbish being thrown.
