

08-04-25

We already have Antisocial behaviour from other ghost kitchens in the factories and this new one will attract more this will also lead to more rubbish being dumped on the street and having foxes and rats everywhere also you will also have people urinating everywhere on peoples property and people coming onto your property to use your bin you will also have people playing loud music and talking loudly in the early hours of the morning. Also some residence feel unsafe coming home late at night due to random people waiting for food across the driveway. Also this would be known spot for drugs to be done like laughing gas/other drugs outside your house
