

08-04-25

Not an ideal location for an already antisocial street from the ghost kitchens round the back of woodside end and the car garages getting cars dropped off at all hours of the night. We already have to suffer cars parking across driveways and rubbish being thrown out of the cars windows or they even come on to your property to put their rubbish/under eaten food in our bins, we have to listen to loud music/talking from the people waiting outside in the street, waking up children trying to sleep. I don't feel safe coming home late incase I have to confront someone parked across my driveway. There will be an increase of rats due to food waste being discarded on the street. All in all it is just an unfair application know what us residents already have to put up with. Does our voice not get heard? How would you like all this going on outside your family home?
