Hi there, There are already few dark kitchens near Woodside End and it is causing issues for residents as they feel unsafe with multiple customers are waiting outside their house or nearby their house with cars waiting outside. There has been few incidents with customers waiting for foods like loud music, arguing in the food and etc. In addition causing car park issues in Woodside End as customers might wait or park on double yellow line and resident cannot block their own driveway since there would be cars both of the road and gap would be tight for cars. Residents get shouted and verbal abuse from cars driver who couldn't go past the car because cars parked on both side of the road. It ain't resident fault since they are following the rules and blocking their own driveway. Also customers would be littering the foods and drinks on the road. We also don't know what is happening inside the car while people. Like they could be drinking or other stuff since Woodside End is dead end road. Also, no camera in the road. If you do approve it, please can put CCTV camera at Woodside End. So that residents can feel a little safer also, customers would might be caution about their behaviour since there is CCTV camera.
