

Data relating to licensing application Ref: 36286

Summary

This document provides an overview of the available data relating to Lilburne Walk Local's (67 Lilburne Walk, London, NW10 0TW) alcohol license application.

Below, the publicly available datasets have been linked to the four statutory licensing objectives: prevention of crime and disorder; public safety; the prevention of public nuisance; and protection of children from harm.

The data provided shows relatively high levels of risk in the area surrounding 67 Lilburne Walk. **From a public health perspective, health risks could be exacerbated by increased access to licensed premises.¹**

Prevention of crime and disorder

In 2021, there were 2,627 offences recorded in the Stonebridge ward, the highest number among all wards in Brent. According to local Metropolitan Police data, Stonebridge ward experiences a high level of crime, with 702 anti-social behaviour (ASB) incidents recorded in the year up to August 2025. In 2023, 64 violent crimes were reported.

The Brent Council's Cumulative Impact Zone (CIZ) Review indicates that Stonebridge is among the most affected wards for alcohol-related offences, with 55 police reports in 2021, suggesting that existing licensed premises might be contributing to these issues.

Met Police ward crime data https://www.police.uk/pu/your-area/metropolitan-police-service/stonebridge/ [accessed 27 th October 2025]	Local data on crime types such as anti-social behaviour (ASB), violence and sexual offences, and public order are high in Stonebridge. 702 instances of ASB recorded in the past 12 months to August 2025.	High figures in these categories indicate that the area already struggles with ASB.
Met Police ward crime data (London Datastore)	Data on violence with/without injury indicates that the Stonebridge ward in	Links between alcohol and violence are well established, and the

¹ Data are primarily available at the ward, borough and Integrated Care Board level; more disaggregated local data is not available. Additionally, several of the datasets identified for this application area are some years out of date.

https://data.london.gov.uk/dataset/mps-recorded-crime-geographic-breakdown-exy3m/ [accessed 24th October 2025]	<p>Brent is high in comparison to other wards within the Borough.</p> <p>42 incidents of violence without injury and 22 incidents with injury were recorded in 2023.</p>	<p>Stonebridge ward has been heavily impacted by violent crime in recent years. An additional alcohol license could potentially exacerbate these issues within the ward.</p>
<p>Brent Council Cumulative Impact Zone (CIZ)</p> https://democracy.brent.gov.uk/documents/s127376/14a.%20Appendix%20A%20-%20Cumulative%20Impact%20Zone%20review.pdf [accessed 27th October 2025]	<p>Data from a Cumulative Impact Zone review shows that the Stonebridge ward was one of the most impacted wards (in 2021) from reported alcohol offences (55 police reports).</p>	<p>High number of alcohol-related offences reported in the ward means that area might not be suitable for additional licenses.</p>
<p>Brent Cumulative Impact Zone Review (CIZ)</p> https://democracy.brent.gov.uk/documents/s127376/14a.%20Appendix%20A%20-%20Cumulative%20Impact%20Zone%20review.pdf [accessed 24th October]	<p>Data from 2021 shows that the Stonebridge ward experienced the greatest number of total notifiable offences (TNO) when compared with other borough wards. The total was 2,627, which represented 9.5% of all recorded crime across the borough.</p>	<p>Crime rates have, historically, been very high in the Stonebridge ward. There is a risk that additional licensed premises in the ward could have a negative impact of crime in the area.</p>

Furthermore, Met Police data for the previous 12 months (October 2024 – 2025) shows that there were 94 Anti-Social Behaviour Incidents on the St Raphael's Estate that were reported to Police, 60% of which were for incidents recorded as 'Rowdy or Inconsiderate behaviour' (Met Police Data).

Public safety

The Brent JSNA (2023) indicates a higher rate of drug misuse compared to the national average (10.3% vs. 8.9%). The connection between drug and alcohol abuse suggests that expanding licensed premises could exacerbate substance misuse issues. ONS (2025) reports an increase in drug poisoning deaths from 17 in 2023 to 21 in 2024. This data suggests that greater alcohol availability might intensify substance abuse problems.

Protection of children from harm

Census data reveals that nearly one-third of Stonebridge residents are children and young people.

Data source	Relevant data	Licensing objection link
ONS (2022) Custom Area Profile – Stonebridge https://www.ons.gov.uk/visualisations/customprofiles/build/#E05013510 [accessed 29 th October 2025]	Drawing on 2021 census data, the proportion of children and young people (0-19) within the Stonebridge ward is close to one third (29.6%).	This data helps demonstrate the vulnerability of the area and the proximity of the proposed premises to places where children live and are likely to frequent.
Brent School and planning area map https://democracy.brent.gov.uk/documents/s35204/Leopold%20App1%20-%20School%20and%20planning%20area%20map.pdf [accessed 29 th October 2025]	There is a high density of primary schools within the Stonebridge ward, according to the area map.	Licensed premises near schools raise concerns about the protection of children from harm objective specifically.
