

08-04-2026

I am not sure how this will benefit an area that has schools/nurseries and a well used library. We already tackling antisocial behaviour and drug use in the area. Women and young girls already feel unsafe walking home in the evenings this will only increase their fear by attracting people who have gambling issues and how it impacts them and their lives. The area is open to families and seniors who use the local cafes and restaurants in the area and I feel this will not encourage them to come out in the evenings. The local councils are all aware of the problems on Walm lane and Willesden high Rd. Protecting families, vulnerable people and women and girls are our most important concern, that alone should ring alarm bells before approving this license.
