Objection to yet another gambling institution in the area for Public Health reasons. Against supporting yet another gambling addiction facility in the area. Willesden Green is already inundated with such money draining facilities and it would be more in line with the Council plan and public health initiatives to provide a safe developmental place for children and young people or a service which will help improve our local area rather than drain resources of the public. Gambling is an addiction which we should not be supporting but encouraging against participation. The cost of living is great enough on local people rather than giving more opportunities to waste money on our doorstep.
