This is outrageous. Brent is allowing what can only be called racist, classist and elitist targeting of the local community. This is an area already socially deprived, with a large number of single person dwellings, a high number of BAME households, high numbers of ESOL, poor health, high unemployment & many long term unemployed and low earners. This is not an area that needs another facility that by your own admission encourages or leads to street drinking, violence and anti social behaviour. You note the Willesden Green has a big problem with anti social benefit but do not consider that a high risk and I note that the risk assessment day it's TWO members of staff will monitor the entrance to the premises and use mag lock to protect themselves clearly. What about the rest of us? Work closely with which police? I've not seen a police Officer locally in about 10 years. The risk assessment is poor, inadequate and frankly wishful thinking. How many other similar facilities are their locally and has any thought been given to the fact that there are enough?
