I oppose because there are already too many in the local area. Many vulnerable and young people are constantly passing this spot and may well be sucked in. Places like this also cause anti social behaviour. The area is known for already having a high problem with addiction. There are many reports to support this. There are many people passing as this is a route to the local tube station with restricted access due to barriers to the road. This tight space will be a bottle neck of people with alcoholic problems and anti social behaviour which will be hard to avoid as they often congregate around the entrances to these establishments.
