189 East Lane. I am sorry I left that off, I was so annoyed and I had to rush to write it as they did not have the blue form up.

Dear Sir/Madam,

How can a shop that allows street drinkers to drink on their land, which has resulted in major ASB (including harassment of women, abuse hurled at passers by, etc) as well as littering, be allowed an alcohol license?

More than this, the staff at this shop positively encourage street drinkers by drinking with them outside their shop and behind their shop. Again, how can they be granted a license to sell alcohol when they break the law about alcohol consumption zones in the Borough?

Not only this but there is consistent street drinking behind this shop on their land that they are well aware of through the police but they have done nothing to help combat this except put up one sign which street drinkers drink alcohol with them in front of!

These street drinkers are a huge problem in the area as they are setting a bad example to children and they make a lot of young girls feel very vulnerable. Why should we help promote street drinking and make this worse? Children will be badly hit by more street drinkers and more alcohol license by being abused and having people set a bad example of how to behave.

The staff at the shop also throw rubbish all over their shop front and onto the pavement as well as erected a building illegally at the back of their shop - surely they need to show some good behaviour to be trusted with an alcohol license.

To say that the shop being granted an alcohol license will make the already bad situation worse is a massive underestimation. Residents in North Wembley want to combat street drinkers not help them.

If the shop owners have a history of aiding and assisting street drinking, littering and breaking the law on several occasions, surely they can not be granted an alcohol license?!

I sincerely hope this does not go through. This whole situation is causing a lot of stress already. People in the area do not want to feel more vulnerable.
