Warning Letter 11775.doc

Dear All

Please see the attached police representations, following on from a telephone conversation with the applicant Mr Stefano Puccini, police have concerns about the front outside area being used, as it now appears that this area is the hotels Fire Evacuation point, during a recent meeting with the property manager for the site he stated the fire brigade had raised concerns about this location being fenced off and used by large numbers for licensable activity.

Police feel allowing this TEN would not uphold one of the licencing objectives namely 'Public Safety' as police feel having up to 300 people standing at the front of the hotel caged in would prevent a safe exit for people inside the hotel if there was the need to evacuate. Mr PUCCINI agreed that this would breach health and safety policy of the hotel and is looking at other measures, until other alternatives are suggested and considered police will be objecting to the TEN.
