Dear Narts Licensing Team

Environmental Health as a Responsible Authority have considered this new premises licence application for a restaurant providing sale of alcohol. We have also considered the conditions proposed in the operating schedule aimed at preventing public nuisance.

We wish to make a representation on the basis of the potential for public nuisance arising from patrons dispersing from the premises at noise sensitive times. The application is seeking a terminal hour of 04:00am Sunday to Thurs, and 05:00am Friday and Saturday.

The area is mixed commercial and residential. There are no nightclubs, late night tourist spots, or destination bars. In arriving at this decision we have had regard to the nature of the area and the terminal hours of similar venues in the immediate vicinity; including Walm Lane and the bottom portion of the High Road.

We propose a revision of the terminal hours applied for and consider this approach is both reasonable and balances the interests of the business and the amenity of local residents.

If your client can agreed to the following terminal hours we will consider withdrawing our representation:

Sunday to Wednesday: Midnight

Thursday to Saturday 01:00hrs

I am in the office tomorrow evening and will then return to the office on 25 August.

The case reference is: SR/10145/18

Kind regards

Martin
