**Re JET SET noise disturbance**

Dear Noise Team

I need to contact you regarding a severe problem of noise disturbance from the Jet Set night club on High Street NW10

Residents - in particular at the Furness Road end of Rucklidge Avenue - are being disturbed on a weekly basis by the clubbers who leave the Jet Set on a Saturday night / Sunday morning, usually around 3 or 4am

This has been going on for some time but now people are completely fed up with the problem

When we had a noise problem before in another location we asked people to ring the Police on 101 at the time we were disturbed, and ask for a complaint to be 'logged'. We also asked people to call the Brent Council Noise Team, again asking for a complaint to be 'logged'.

After a few weeks and many complaints the Police were able to approach the bar owner and – eventually – the situation improved.

I hoped that we would be able to do that on this occasion to resolve the problems with the Jet Set.

Last time we were given a REFERENCE NUMBER by the POLICE that we could quote when we rang 101 to complain, so that all the complaints were logged together.

I have contacted the POLICE to ask if this could be repeated for this issue.

A resident called to make a complaint to you at the Noise Team yesterday at 3 am but was told it was not possible to record any complaint and to ring again in the day time.

I would be grateful if you could tell me the best way to resolve this issue, and if there is a way to record the problems with Brent Council's Noise Team? Would you be able to set up a CASE reference number so that we can ensure complaints are all recorded?

I hope that you can assist us with this as people really are now very distressed about the weekly disturbances.

Please can you let me know if you have any advice or information.

It would be very helpful if you could reply to all parties above

Of course if you are free over the next week we would be very pleased to meet you to discuss this further

For obvious reasons, I would be grateful if you could ensure that our names and email addresses are NOT passed to anyone at, or connected to, the Jet Set Club

Best regards, [REDACTED]

**To:** ENS Noise Team  
**Subject:** Jet 7 sete night club noise

To whom it may concern,

I would like to make a complaint about the jet 7 sete nightclub located at 252 High Street, NW10 4TD

They started playing very loud music at 18:00 this Sunday the 14th of February 2016.

It's now 20:33 and my kitchen rattles everything from the vibration of the loud speakers playing rap music.

I have here at my home a newborn baby and a 2year old son and this noise is stressing everyone in my home.

Everytime this night club opens my peace at my home is gone.

I know that their licence only allow them to open from 10pm till 2am but I dont understand how that can be allowed since they are located under several studio flats like the one I live in.

when I moved here in May of 2015 this night club was not operating.

by November they opened and ever since my family and my neighbours are complaining of the distress noise which can reach 100 decibels.

Please, if there are anything you guys can do to help bring the peace to the residents of 248 High Street again we are delighted to join forces for a solution in this matter,

This nightclub should have the proper noise reduction walls which that's clearly not the case.

Thank you

Resident at [REDACTED]

**Noise Nuisance Investigation-Environmental Protection Act 1990- PALMBEACH LEISURE 252 High Street, London, NW10 4TD**

I am employed as the Team Leader - Nuisance Control for the Environmental Health of the London Borough of Brent. I have over 11 years experience of investigating noise nuisance from both commercial and domestic properties. I hold a Masters degree in Acoustics and Noise Control and am a Member of the Institute of Acoustics.

At 03:14 hours on the 15th February whilst patrolling the borough I noted loud music emanating from the rear of Palmbeach Leisure, 252 High Road, NW10.

I parked the vehicle adjacent to [REDACTED] Clifton Road (see exhibit/04845/96/map) at a distance of approximately 28 metres from the rear of the aforementioned premises. In the vehicle with the windows shut and the radio on loud thunderous music could be heard accompanied by the sound of vibrating metal doors. The doors to the rear of the club were resonating due to the intensity of the music.

I left the premises at 03:26 the level of music remain undiminished, I am satisfied that the level of music was such as to contravene the noise abatement notice served on the 19th May 2003(exhibit02/05837/01) under the Environmental Protection Act 1990.
