Subject: RE: Licence Consultee Email. Licence Application Number:15681

Dear Licensing Team,

Re - Licence Consultee Email. Licence Application Number:15681

Location

The location of this venue is not within a residential area. The nearest residential building is around 300 meters from the building.

Joint visit/ Site assessment.

There was a joint visit by the noise/nuisance team, the licensing team and the public protection team. The venue has not been used since the original owner has taken back the venue from another management. The owner pointed out locations of the noise speakers in the function room which were noted. The walls are well insulated with 90% of all sections in concrete and the windows are double glazed. There is a door from the function room which leads to the back of the venue.

Representations.

From the noise team's perspective suggestions have been made for the owner to :

- (a) Place noise speakers at four spread out positions in the room to ensure equal spread of noise within the room.
- (b) Ensure the exit door leading to the back of the venue is kept shut during all times of use of the function room to reduce noise escaping.

I will be forwarding an email to the business owner to agree with the above reps and following his agreement, will formally request them removed from this application.

Regards,
