

Public Rep 3

Friday evenings at the school absolutely does not make sense given that this is a residential area, and there are plenty of bars in the area.

Public Rep 4

This application is very unclear and I would appreciate clarification. The original application referred to an extension of Sunday trading and was posted on 10/04. That application showed the Friday hours but made no reference to them in the text. This application refers to Friday trading hours but makes no reference to them in the text and has identical details regarding the Sunday hours in the details box. If the application is for a new license on the Friday evening to trade from the playground then I have strong objections on the grounds of public nuisance, noise and air pollution. In order to be able to meaningfully engage in this process the application needs to be clear, full and explicit in detail. I would also point out the application on the school fence is curled up and only noticeable as I uncurled the sign.
