Notes

This is a table to track the progress of scrutiny recommendations made by one of the formal scrutiny committees at Brent Council. It is a standing item on the Committee's agendas, so that the Committee can keep track of the recommendations it has made, the decisions made, implementation status and provoke consideration of outcomes that have for residents, the Council and its statutory partners.

The tracker lists the recommendations made by the committee throughout a municipal year and any recommendations still not fully implemented from previous years since June 2019.

The tracker documents the scrutiny recommendations made, the dates when they were made, the decision maker who can make each decision in respect of the recommendations, the date the decision was made and the actual decision taken. The executive decision taken may be the same as the scrutiny recommendation (e.g. the recommendation was “agreed”) or it may be a different decision, which should be clarified here. The tracker also asks if the respective executive decisions have been implemented and this should be updated accordingly throughout the year.

Scrutiny Task Group report recommendations should be included here but referenced collectively (e.g. the name of the scrutiny inquiry and date of the agreement of the scrutiny report and recommendations by the scrutiny committee, along with the respective dates when the decision maker(s) considered and responded to the report and recommendations. The Committee should generally review the implementation of scrutiny task group report recommendations separately with stand-alone agenda items at relevant junctures – e.g. the Executive Response to a scrutiny report and after six months or a year, or upon expected implementation of the agreed recommendation of report. The “Expected Implementation Date” should provide an indication of a suitable time for review.

Key:

date of scrutiny committee meeting - For each table, the date of scrutiny committee meeting when the recommendation was made is provided in the subtitle header.

Subject – this is the item title on the committee’s agenda; the subject being considered.

Scrutiny Recommendation – This is the text of the scrutiny recommendation as it appears on the minutes – **in bold**.

Decision Maker – the decision maker for the recommendation, (**in bold**), eg the Cabinet (for Council executive decisions), full Council (for Council policy and budgetary decisions), or an NHS executive body for recommendations to the NHS. In brackets, (date), the date on which the Executive Response was made.

Executive Response – The response of the decision maker (eg Cabinet decision) for the recommendation. This should be the executive decision as recorded in the minutes. The Executive Response should provide details of what, if anything, the executive will do in response to the scrutiny recommendation. Ideally, the Executive Response will include a decision to either agree/reject/or amend the scrutiny recommendation and where the scrutiny recommendation is rejected, provide an explanation of why. In brackets, provide the date of Cabinet/executive meeting that considered the scrutiny recommendation and made the decision.

Department – the Council directorate (and/or external agencies) that are responsible for implementation of the agreed executive decision/response. Also provided, for reference only, the relevant Cabinet Member and strategic director.

Implementation Status – This is the progress of any implementation of the agreed Executive Response against key milestones. This may cross reference to any specific actions and deadlines that may be provided in the Executive Response. This should be as specific and quantifiable as possible. This should also provide, as far as possible, any evidenced outcomes or improvements resulting from implementation.

Review Date and status - This is the expected date when the agreed Executive Response should be fully implemented and when the scrutiny committee may usefully review the implementation and any evidenced outcomes (eg service improvements). A “traffic light” indicator, red, amber and green, is provided to assess implementation progress. (Note: this is the implementation of the agreed Executive Response, which may not be the same as the scrutiny recommendation).

not implemented

partly implemented

implementation complete

Appendix A

Continued from table, 4 December 2019, Tourism in Brent, implementation Status (Recommendation: That the Council improve the public realm space around key tourist attractions...)

The following work has been completed or is planned across the borough:

Kilburn High Road

Officers are working in partnership with Camden to develop and fund an extensive public realm improvements to Kilburn High Road. Brent have already allocated £1m of investment towards wider area improvements and anticipate a similar level of contribution from Camden. The proposed scheme will go to consultation early in the next couple of months and subject to the outcome of consultation and the allocation of funding, we envisage that improvements will commence in the summer. A healthy street approach will be taken in the design and the scheme will provide wider high quality pavements, cycle lanes and cycle parking, trees and greening as well as new street furniture.

As a first phase of improvements, officers recently consulted on proposals to improve the area outside Kilburn Underground station, which will include a new wider pavement at Exeter Road, new trees and undercover cycle parking with a cycle pump and repair station. We anticipate that this work outside Kilburn station will commence this financial year and be completed ahead of the Brent Borough of Culture mile long street party on 11th July 2020 with wider improvements starting in September 2020

There is also Neighbourhood Community Infrastructure Levy secured to deliver new murals and lighting near the gateway from Kilburn station.

Kingsbury

There has been £2.1m of investment in Kingsbury to deliver public realm improvements to the high street including new pavements, trees and cycle lanes. There are also plans to convert the existing zebra crossing on Fryent Way to a pelican crossing to improve safety and accessibility in the spring and develop improvement to Kingsbury roundabout.

Alperton

A £0.7m improvement scheme near Alperton Station and Alperton Community School, at the gateway to Ealing road shopping area and the Alperton regeneration area is substantially complete. This has improved safety for pedestrians and cyclist with wider and better quality footways, relocated bus stops, new street trees and street furniture, and better located and improved pedestrian crossings. Officers are liaising with Transport for London on improving the surfacing to Alperton Station forecourt.

Local Shopping Areas

A £20m capital investment in improving the boroughs footways will include improvements to some of our local shopping areas, decluttering, providing street trees, greening and designing out problems such as vehicle override, to minimise future demands on maintenance. The locations identified include; Preston Road, Sidmouth Road, Church Lane, College Road and Neasden Lane

Kensal Corridor

Further to the development of a masterplan for Kensal Rise in 2018, officers consulted local residents and businesses in the area in July 2019 on a design to improve the public realm on the Kensal Corridor and Station Terrace. Overall there was a positive response to the proposals to provide wider high quality pavements, new pedestrian crossing facilities, new street trees and greening, relocate bus stops and stands, provide bus shelters, introduce new inset parking and loading bays and restrictions, improve bus movements and reconfigure traffic signals to reduce bus journey times. The Delegated Decision report has recently been published on the Brent consultation hub. £0.9m of Bus Priority Funding has been allocated. Once additional funding has been secured, improvements will be implemented over the next 2 years. Phase 1 begins in March 2020 in conjunction with Westminster's plans to improve the signal junction at the Harrow Road / Ladbroke Grove / Kilburn Lane.

Colourful crossings

Officers are introducing our first colourful crossings in the borough to support our Borough of Culture 2020 celebrations. Colourful crossings are providing colourful surfacing where in busy locations pedestrians cross the road such as at traffic signals or adjacent to zebra crossings to help create vibrant spaces and encourage walking and sustainable travel. This year's programme has been agreed and there will be two new NCIL funded colourful crossings in Ealing Road and near Willesden Green Library on Willesden High Road. These will be by artists working with the community.

Following Brent's first colourful LGBT+ rainbow crossing outside the Brent Civic Centre, 2 additional rainbow crossings are planned, one outside Kingsbury Station, planned for May 16/17th to coincide with the completion of the George Michael mural, and one outside the Kiln Theatre, Kilburn High Road planned for June. The colourful LGBT+ rainbow crossings will also promote diversity and social inclusion and further opening will be planned this year.

Wembley Park – Olympic Way

Investment in Wembley Park has seen the introduction of new paving, lighting and trees at the foot of Wembley Park station and along the full length of Olympic Way.

Wembley to Willesden Healthy Streets Corridor

TfL in partnership with the Council are now developing a Healthy Streets Corridor between Wembley and Willesden. Pre-engagement meetings with members were held in January 2020, with pre-engagement surveys with residents and businesses taking place in February 2020. A report will be taken to Cabinet in the late spring 2020 with wider public consultation planned towards the end of 2020. The scheme will include improvements for walking, cycling, public transport accessibility, as well as greening along the corridor.

Wembley Signage

The Council are currently working with the FA on a signage strategy for the stadium. This will include enhanced pedestrian wayfinding signage around stadium. There are also plans to install digital traffic information signs on main routes into Wembley including the A406 and A40 to warn motorists of congestion in the area and encourage alternative routes.
